Activity 4.1: Boundary Lines & Shading

A

Name: _____ Partner's name: _____ Date: _____

Directions: Rewrite each inequality so y is alone (if needed). Then give the boundary line, whether it is solid or dashed, and where to shade (above, below, left, or right). Example answer: $y = 2x - 1$, dashed, above.

Work on your own. Then compare answers with your partner after each problem. If they don't match, find the mistake together before moving on.
